How do I set up email on my Android device?

There's a useful help video at

<https://www.youtube.com/watch?v=NncTh2OAg8>

Manual Configuration

- Open the mail application on your Android device.
- Select **Add New Account** and enter the **mailbox name** and it's **password**.
- Select **Manual Setup** and select **IMAP Account**.
- The **User name** will need to be the same as the mailbox name.
- Enter **imap.stackmail.com** as the **IMAP Server**, change the **Security Type** to **SSL**, **Port 993** should then be used.
- Enter **smtp.stackmail.com** as the **SMTP Server**, change the **Security Type** to **SSL**, **Port 465** should be added.
- The outgoing mailserver **User name** and **Password** are the username and password for your mailbox.
- Select **Sign In** and the mailbox will be added to your Android.
